Instruction

Educational Philosophy and Objectives

The focus of the total educational program is manifest in the Board of Education's continuing vigilance in the area of instructional goals and objectives. The Board strives to establish an educational program for the District as a whole that will meet the needs of the students as individuals. To meet this goal, the Board recognizes the following common educational objectives:

Physical and Emotional Well Being

Education should contribute to the learner's physical and emotional well being, especially to a sense of personal worth and to a capacity for influencing one's own destiny.

Basic Communication Skills

Education should develop in each learner the basic skills needed for communication, perception, evaluation and conceptualization of ideas. Among the most important are reading, writing, speaking, listening, and visual and computational skills.

Effective uses of Knowledge

Education should provide for each learner access to man's cultural heritage, stimulate intellectual curiosity, and promote intellectual development.

Capacity and Desire for Lifelong Learning

Education should foster and stimulate in each learner the natural desire for lifelong learning and should develop the skills necessary to fulfill that desire.

Citizenship in a Democratic Society

Education should provide each learner with a knowledge and understanding of how our society functions in theory and in practice. Education must also foster individual commitment to exercise rights and responsibilities of citizenship and to protect the rights of others.

Respect for the Community of Man

Education should provide each learner with knowledge and experience which contribute to an understanding of human similarities and differences, and which advance mutual respect for humanity and for the dignity of the individual.

Occupational Competence

Education should provide the learner with the skills, experience, attitudes and guidance for initial job placement. It is even more important for the learner to develop a capacity to adapt to changing conditions.

Understanding of the Environment

Education should provide each learner with knowledge and understanding of the social, physical and biological worlds, and the balance between man and his environment, and should develop attitudes and behavior leading to intelligent use of the environment.

Creative Interests and Talents

Education should provide each learner with varied opportunities to nurture interests, to discover and to develop natural talents, and to express values and feelings through various media.

Individual Values and Attitudes

Education should expand and advance the human dimensions of all learners, especially by helping them to identify and cultivate their own spiritual, moral and ethical values and attitudes.

School Accountability

According to the Illinois General Assembly, the primary purpose of schooling is the transmission of knowledge and culture through which students learn in areas necessary to their continuing development and entry into the world of work. To fulfill that purpose, the State Board of Education prepared State Goals for Learning with accompanying Illinois Learning Standards.

The Board of Education gives priority in the allocation of resources, including funds, time, personnel, and facilities, to fulfilling this purpose.

Quality Assurance

The Board continuously monitors student achievement and the quality of the District's work. The Superintendent shall supervise the following quality assurance components, in accordance with State statute and State Board of Education rules, and continuously keep the Board informed:

1. Prepare each school's annual recognition application and quality assurance appraisal, whether internal or external, to assess each school's continuous school improvement.
2. If applicable, implement a No Child Left Behind Act plan, including the completion of the NCLB Consolidated Application, and seek Board approval where necessary or advisable.
3. Continuously assess whether the District and its schools are making adequate yearly progress as defined by State law.
4. If applicable, develop District and School Improvement Plans, present them for Board approval, submit them to the State Superintendent for verification, and supervise their implementation. If applicable, develop a restructuring plan for any school that remains on academic watch status after a fifth annual calculation.
5. Prepare a school report card, present it at a regular Board meeting, and disseminate it as provided in State law.

The Superintendent shall make regular assessment reports to the Board, including projections whether the District and each school is or will be making adequate yearly progress as defined in State law. The Superintendent shall seek Board approval for each District and/or school improvement plan and otherwise when necessary or advisable.

School Choice for Students Enrolled in a School Identified for Improvement, Corrective Action, or Restructuring

This section applies to only those students enrolled in a school identified by the Board for school improvement, corrective action, or restructuring as defined by federal law. Those students may transfer to another public school within the District, if any, that has not been so identified. If there are no District schools available into which a student may transfer, the Superintendent or designee shall, to the extent practicable, establish a cooperative agreement with other districts in the area. A student who transfers to another school under this policy may remain at that school until the student completes the highest grade at that school. The District shall provide transportation only until the end of the school year in which the transferring school ceases to be identified for school improvement or subject to corrective action or restructuring. All transfers and notices provided to parents/guardians and transfer requests are governed by State and federal law.

Students from low-income families shall be provided supplemental educational services as provided in federal law if they attend any District school that: (1) failed to make adequate yearly progress for 3 consecutive years, or (2) is subject to corrective action or restructuring.

1. Support the District's educational program,
2. Maximize facility usage without undue overcrowding, and
3. Provide substantially comparable instructional programs across the District.

Students, for instructional purposes, may be placed in groups within a school that do not necessarily follow grade level designations. For purposes of attendance reporting and other records, however, each student is assigned a grade-level placement. The Superintendent or designee shall assign students to class.

Class Size Guidelines

The Board of Education is aware that class size and/or teaching load can affect the quality of instruction. The Board of Education will attempt to provide a favorable student-teacher ratio in as many classroom situations as possible. Financial considerations will weigh in class size decisions. The Superintendent shall work closely with the Building Principal in establishing a reasonable teacher-student ratio in each class.

The ratio of pupils to classroom teachers will generally not exceed the following proportions. Accordingly, the Board shall attempt to adhere to the following class size guidelines:

1. Grades Kindergarten and One, twenty-five to one (25/1);
2. Grades Two through Five, twenty-eight to one (28/1);
3. Grades Six through Eight, thirty to one (30/1).

If student numbers exceed the above guidelines, consideration will be given to providing the services of a teacher aide.

Kindergarten

The District maintains a full-day kindergarten with an instructional program that fulfills the District's curriculum goals and objectives and the requirements of the State law. The District also offers a half-day kindergarten for those parents/guardians who request a half-day program.

The District also offers pre-school programs for eligible children ages 3-5, through "Early Step" and the Bi-County Special Educational Service Cooperative.

Extracurricular and Co-Curricular Activities

Extracurricular or co-curricular activities are school-sponsored programs for which some or all of the activities are outside the instructional day. They do not include field trips, homework, or occasional work required outside the school day for a scheduled class. "Co-curricular activity" refers to an activity associated with the curriculum in a regular classroom and is generally required for class credit. "Extracurricular activity" refers to an activity that is not part of the curriculum, is not graded, does not offer credit, and does not take place during classroom time; it includes competitive interscholastic activities and clubs.

2. Fees assessed students are reasonable and do not exceed the actual cost of operation.
3. The District has sufficient financial resources for the activity.
4. Requests from students.
5. The activity will be supervised by a school-approved sponsor.

Non-school sponsored student groups are governed by School Board policy, 7:330, *Student Use of Buildings - Equal Access*.

For students in kindergarten through 8th grade, selection of members or participants is at the discretion of the teachers, sponsors, or coaches, provided that the selection criteria conform to the District's policies. Students must satisfy all academic standards and must comply with the activity's rules and the student conduct code.

For high school students, selection of members or participants is at the discretion of the teachers, sponsors, or coaches, provided that the selection criteria conform to the District's policies. In order to be eligible to participate in any school-sponsored or school-supported athletic or extracurricular activity, a student must satisfy the Illinois High School Association's scholastic standing requirements (doing passing work in at least 20 credit hours of high school work per week) and may have no more than one grade of "F". Grading and Promotion

The Superintendent shall establish a system of grading and reporting academic achievement to students and their parents/guardians. The administration shall determine remedial assistance for a student who is not promoted.

Every teacher shall maintain an evaluation record for each student in the teacher's classroom. A District administrator cannot change the final grade assigned by the teacher without notifying the teacher. Reasons for changing a student's final grade include:

- A technical error in assigning a particular grade or score,
- The teacher agrees to allow the student to do extra work that may impact the grade,
- An inappropriate grading system used to determine the grade, or
- An inappropriate grade based on an appropriate grading system.

Should a grade change be made, the administrator making the change must sign the changed record.

A student in sixth grade will generally be retained if he/she receives a total of nine (9) failing grades during the school year.

A student in seventh or eighth grade will generally be retained if he/she receives a total of seven (7) failing grades during the school year.

A student may be offered a summer bridge program of more than 90 hours to help with achievement, but this may not have bearing on retention or promotion.

High School Credit for Proficiency

Proficiency Credits

Subject to the limitations in this policy and State law, the Superintendent is authorized to establish and approve a program for granting credit for proficiency with the goal of allowing a student who would not benefit from a course because the student is proficient in the subject area to receive credit without having to take the course. A student who demonstrates competency under this program will receive course credit for the applicable course and be excused from any requirement to take the course as a graduation prerequisite. No letter grade will be given for purposes of the student's cumulative grade point average. The Superintendent or designee shall notify students of the availability of and requirements for receiving proficiency credit.

Proficiency credit will be offered in the following subject areas:

Foreign language - A student is eligible to receive one year of foreign language credit if the student has graduated from an accredited elementary school and can demonstrate proficiency, according to this District's academic criteria, in a language other than English. A student who demonstrates proficiency in American Sign Language is deemed proficient in a foreign language and will receive one year of foreign language credit. A student who studied a foreign language in an approved ethnic school program is eligible to receive appropriate credit according to the level of proficiency reached; the student may be required to take a proficiency examination.

Other proficiency testing - The program for granting credit for proficiency may allow, as the Superintendent deems appropriate, course credit to be awarded on the basis of a local examination to a student who has achieved the necessary proficiency through independent study or work taken in or through another institution. Proficiency testing may also be used to determine eligible credit for other subjects whenever students enter from non-graded schools, non-recognized or non-accredited schools, or were in a home-schooling program.

Course Credit for High School Diploma

The Superintendent or designee may investigate, coordinate, and implement a program and schedules for students in grades 7 and 8 to enroll in a course required for a high school diploma .

Students in grades 7 and 8 may enroll in a course required for a high school diploma when: (1) the course is offered by the high school that the elementary student would attend, (2) the student participates in the course at the location of the high school, and (3) the student's enrollment in the course would not prevent a high school student from being able to enroll.

Students in grades 7 and 8 may enroll in a course required for a high school diploma where they attend school when: (1) the course is taught by a high school teacher who teaches in a high school of the district where the student will attend high school, and (2) no high school students are enrolled in the course.

A student that successfully completes a course required for a high school diploma while in grades 7 and 8 shall receive such academic credit from the Board. That academic credit shall satisfy the requirements of Section 27-22 of The School Code for purposes of receiving a high school diploma, unless evidence about the course's rigor and content show that the course did not address the relevant Illinois learning standard at the level appropriate for the high school grade during which the course is usually taken. The student's grade in the course shall also be included in the student's grade point average in accordance with Board policy.
